

After implementing the QuickSet Ink Pre-Setting System, the average user will recover \$50,000+ (through paper waste reduction) the very first year of usage - above and beyond the cost of the system.

“Before we had levers, our typical make-ready waste was around 2400 copies. Using QuickSet levers and the QuickSet ink pre-setting system, our typical make-ready waste is now less than 200 copies. We are now consistently producing higher quality printing than our major competitor, who has over 40 million dollars worth of press equipment and press controls. Even with our typical press run consisting of only about 6000 copies, our waste is now at 3%.” – La Republica, Costa Rica [QuadStacks]

-----

“Using the QuickSet system, our waste is now consistently around 300 copies. Our consistency and quality have allowed us to expand to three shifts.” – Elizabethton Star, Elizabethton , TN [Harris V15A]

-----

“We have one QuickSet system providing pre-sets for six four-highs. Not only did our waste drop dramatically and not only did the system pay for itself quickly, but this is the first time we have seen examples of our web newspaper press more faithfully reproducing color than our sheetfed presses.” – Prolific Graphics, Winnepeg, Manitoba, Canada [Tensor]

-----

“Now that we are using QuickSet Ink Pre-Setting, the waste has dropped through the basement.” – Highland Publishing, Marble Falls, TX [QuadStacks]

-----

“We eliminated 85% of our make-ready waste.” – Snohomish Publishing, Snohomish, WA [QuadStacks/Harris V15A]

-----

“We can operate our press on a skeleton crew – and we now feel we could not live without the QuickSet system.” – Owyhee Publishing, Homedale, ID [QuadStacks]

-----

“The smartest purchase we have ever made. With the QuickSet ink pre-sets, we even no longer need to use a special red ink to get the deep reds our advertisers are always insisting upon.” – Yuma Daily Sun, Yuma, AZ [Urbanite]
